

**Tech Capacity**, is a private limited company located in the central business district of Kuala Lumpur, Malaysia. Its establishment complements the founder's passion for delivering the ultimate learning experience for educators and students.

As the learning landscape evolves with the infusion of technology, learners encounter a new set of learning challenges and requirements. Tech Capacity engineers the optimal and safe learning experience for the hybrid learning environment.

However, major barriers limiting educators and students in optimizing digital provisions include lack of digital skills and awareness. These constraints limit students and educators' actual capacity to perform and enhance their skills to produce desired results.

Bringing out the optimal capacity of students and educators to perform and enhance their digital skills and awareness is central to Tech Capacity's mission. Tech Capacity addresses the pressing need of overcoming pervading issues of low adoption and low sustainability rates of educational technology deployment confronted by both businesses and education institutions at all levels.

With over 25 years of expertise and a growing community of experts, Tech Capacity delivers the ultimate learning experience for leaders, educators and learners.

Tech Capacity delivers specialized services for education and skill development to three sets of audience:

- corporate, businesses and organizations
- higher education
- K 12.

- Market access and strategic planning for digital and conventional education programs at all levels
- Framework, policy and standard development, module design, program management and program implementation
- Future proof students' skills & sustain and scale your educational technology programs
- New-aged soft skill development:
  - Digital citizenship programs
  - Social and emotional learning skills
  - Leaders and educators' capacity development Design thinking programmes
